Projects

[Team Manager](#) | NextJs, Supabase

A full stack team management website. Users can create or join teams. Chat with their team members, assign tasks, start and complete projects and get real time notifications.

It uses **Nextjs** for frontend, **Supabase** for backend, **Pusher** for real time features.

[MernEats](#) | MERN

A full stack food ordering app. Users can search for restaurants in their city. Apply filters. See restaurant details and order food.

Users can also create their own restaurant.

It is made using **Mern stack**, authentication was done using **Auth0**

[Movix](#) | React.js

A movie database website. It makes api requests to a third-party database. Users can search for movies or tv shows. View details, cast and trailer.

The website has a modern user experience. Lazy loading, infinite scrolls etc.
